What is MultiFix Screw?

Can be used with any materials such as PMMA, Resin, Graphite, Zirconia and various metals.

Recommended Torque

up to 25 Ncm

Compatibility

Geo Multiscrew Abutments (Osstem, Dentium, Straumann, Nobel)

UV Type: All Geo Multi-screw Abutments.

UV Angle Solution

The screwdriver can be tilted up to 25 degrees. (55 degrees in total when combined with the Geo Angled Base Abutment)

Advantages of Geo MultiFix

- 1 Easy to attach and detach as no cement is used. It is advantageous for maintenance and repair.
- 2 Screws are made in distinct colour for each implant system.
- 3 Accurate prosthetics can be manufactured using GeOMEDI's highly precise library.
- 4 Libraries compatible with genuine Multi-unit products (Osstem, Nobel MUA and Straumann SRA)
- 5 Cost savings by not using cylinders.
- 6 Increased strength and stability with sufficient screw thickness.
